## Pattern Maker - pattern drafting software for PC

PatternMaker is a CAD-program programmed for pattern drafting in USA. It is an independent CAD software package. Using plug-ins, macros, with the PatternMaker package allows one to draw patterns with one's own measurements.

➤ [To the website of PatternMaker Software, USA](#)

PatternMaker software allows drawing patterns for all kinds of figure shapes. Computerized patterns solve problems especially if you often need to adjust standard patterns to fit your body shape.

### PatternMaker 6 has been released

in November 2001

➤ [Read about new properties](#)

### Five program versions available

- PatternMaker Basic, free, to run the macros
- PatternMaker Deluxe, program version to run the macros and edit the patterns drafted by the macros
- PatternMaker Home, complete, independent CAD software package
- PatternMaker Expert, with grading and digitizing

- PatternMaker Marker, industrial version

### **Freeware Basic Version**

The Free PatternMaker Basic contains macro patterns for ladies trousers and collars in fully functional form. The Trouser Macro allows you to print trouser patterns with your measurements. The Collar Macro can be used to print collars for existing jacket patterns.

### **Print with any printer**

Patterns can be printed out with any printer. If the printer uses A4 or Letter paper, the program divides patterns onto several sheets and prints guides for matching into the corner of each sheet.

## **Macros - fashion patterns to given measurements**

Adjusting computerized patterns for your own measurements is easy: all you need to do is enter your measurements and the computer will print out patterns with a precise fit for you! Macro pattern collections are available for all basic ladies garments, as well as for menswear, teenwear, childrenswear, babywear, maternitywear and lingerie. PatternMaker Macros

have been designed and programmed in Finland using the Scandinavian pattern drafting method.

## **Measuring makes the difference**

Measuring is the most important thing that is different in PatternMaker compared to other pattern drafting programs sold in USA. Only unambiguous and easy to take measurements are needed. This is because the pattern drafting system used for programming the macros is different, the Scandinavian one.

Scandinavian pattern drafting system is very near to the Mueller & Sohn pattern drafting system widely used in Europe (e.g in Burda patterns).

Read about the measuring for the PatternMaker macros. Use the measuring instructions also for the pattern drafting lessons on this site.

## Use PatternMaker for many purposes

I have used PatternMaker to produce patterns for a women's clay torso. I do not know whether "real artists" approve my technique but for me it was a lot of fun
